## VALUEWORKS LONG-BIASED COMPOSITE

## OCTOBER 2021

## STRATEGY SUMMARY

ValueWorks' long-biased composite accounts are managed with a bottomup, research-driven, value discipline. We seek investments in publicly traded entities where a disparity exists between the value of a company's underlying assets and the price at which they can be controlled through a specific security; securities across the capital structure are evaluated for the
best risk return profiles. The objective for these portfolios is to generate superior capital appreciation with average market volatility. We target $100 \%$ net-long exposure within a range of $75 \%-125 \%$, comprised of $80-$ $150 \%$ gross-long exposure and $0-35 \%$ gross-short exposure. Our hedge fund, VWLP, is part of this group*.
